UNITED STATES DEPARTMENT OF AGRICULTURE

AGRICULTURE RESEARCH SERVICE
PLANT QUARANTINE DIVISION

LIST OF INTERCEPTED PLANT PESTS, 1956

(List of Pests Recorded from July 1, 1955, through June 30, 1956 as Intercepted in, on, or with Plants and Plant Products Entering United States Territory.)

Complied by
Judith Hunt
Plant Quarantine Aid

INTRODUCTION

This forty-third report of interceptions summarizes the records of insect pests, plant pathogens, and certain other organisms found in, on, or with plant products (1) imported, (2) offered for but refused entry, (3) held as ships' stores, etc., and hence not offered for entry through customs, (4) offered for entry for immediate transportation and exportation in bond, and (5) in domestic shipments between the American Virgin Islands, Hawaii, and Puerto Rico and the mainland.

This report deals with insects and plant diseases of known or potential plant quarantine significance to the United States. Some common organisms are included if they are (1) new to the country of origin, or (2) new to the host plant, or (3) are of such limited distribution in the United States that they are worthy of mention.

The data for this list which includes some for the previous year, are largely obtained from identifications made by specialists of the Entomology Research Division and Plant Quarantine Division, supplemented by information supplied by State officials. Some, however represent critical studies and determinations made by specialists of the Crops Research Division who also identified many of the host plants cited.

All scientific names are reviewed by specialists in the Department to assure conformance to the International Rules of Nomenclature.

Every effort is made to give the correct origin for all collections listed, questionable cases are omitted or the origin is listed as unknown.

INTERCEPTIONS FROM AIRBORNE MATERIAL

The rapid growth of air transportation continues to increase the danger of foreign plant pests being introduced by this means. In addition to international air travel, commerce in plants and plant products by air is developing steadily. The short time in which pests may now be brought from all parts of the world makes conditions more favorable for their survival and necessitates constant vigilance to apprehend them at ports of entry.

Pests were intercepted on plant material arriving by baggage, express, freight, mail, and stores. During the year 3,367 interceptions were made of insects on imported plant parts or as stowaways, and 476 interceptions of plant diseases.

Some important insects intercepted in airborne material were:

The citrus blackfly (Aleurocanthus woglumi) on leaf of Citrus sp. in baggage from Mexico.

Anastrepha distincta (?) in inga pod in express from Guatemala. Anastrepha fraterculus in sapodilla in baggage from Venezuela.

The Mexican fruit fly (Anastrepha ludens) in mango in baggage from Mexico; in orange in baggage and stores from Mexico; and in orange in baggage from Guatemala.

The West Indian fruit fly (Anastrepha mombin praeoptans) in mango in baggage from Costa Rica, Cuba, Guatemala, Haiti, Honduras, Jamaica, Mexico, Nicaragua, Panama, and Salvador; in mango in cargo from Costa Rica, Guatemala, and Puerto Rico; in mango in mail from Puerto Rico and Salvador; and in mango in quarters from Guatemala.

Anastrepha serpentina in Annona sp. in baggage from Peru; in sapodilla in baggage from Guatemala, Nicaragua, and Salvador; and in star-apple in cargo from Guatemala. One adult of A. serpentina in cabin of an airplane from Central America or South America.

Anastrepha striata in guava in baggage from British Honduras, Costa Rica, Nicaragua, and Salvador and in guava in quarters from Guatemala.

Carposina sasakii in apple in baggage and stores from Japan.

The Mediterranean fruit fly(Ceratitis capitata) in apple in baggage from Italy; in apple in quarters from Portugal; in apple in stores from the Azores, Portugal, and Spain; in apricot in baggage and stores frolm Italy; in apricot in stores from an unknown origin; in coffee berries in baggage from Brazil; in coffee berries in pre-flight inspection of baggage and cargo leaving Hawaii for the mainland; in fig in baggage from the Island of Rhodes and Italy; in guava in baggage from the Azores and Israel; in loquat in baggage from the Azores; in Mandarin orange in baggage from Cape Verde Islands and Israel; in medlar in baggage from Italy; in nectarine in stores from France; in orange in baggage from Israel, Italy, Lebanon, and Portugal; in orange in stores from the Azores, Israel, Portugal, and Spain; in peach in baggage from Italy, Lebanon, Portugal, and Spain; in peach in cargo from Italy; in peach in stores from Brazil, France, Italy, Portugal, and Spain; in pear in baggage from France, Portugal, and Spain; in pear in quarters from Libya and an unknown origin; in pear in stores from Portugal; in pricklypear in baggage from Italy; in quince in baggage from Greece; and in sweet lime in baggage from the Azores. C. capitata (?) in green almond in baggage from Greece; in guava in baggage from Portugal; in guava in quarters from South America; in lemon in stores from Spain; in mango and mountain apple in preflight inspection of baggage leaving Hawaii for the mainland; in nectarine in stores from Brazil; in orange in baggage from Israel and Italy; in orange in stores from the Azores, Portugal, and Spain; in peach in baggage from Italy; in peach in stores from Spain; in pear in quarters from Italy; and in persimmon in baggage from Italy.

The banana root borer (Cosmopolites sordidus) in root of banana plant in baggage

from Panama.

Cylas formicarius ssp. in sweetpotato in cargo from the Philippines and Thailand. An adult of Dacus cucurbitae was found in preflight inspection of a plane leaving Hawaii for the mainland and another adult of the same species was found on the flight deck of an airplane originating in Midway.

Dacus dorsalis in coffee berries, mango, papaya, and ti berries in preflight inspection of baggage leaving Hawaii for the mainland. An adult of D. dorsalis was found in an airplane leaving Hawaii for the mainland and another adult was found on an airplane

from the West Pacific. D. dorsalis (?) in Thevetia peruviana in preflight inspection of baggage leaving Hawaii for the mainland.

Dacus oleae in olive in baggage from Greece, Italy, Lebanon, and Portugal and in

olive in stores from Italy.

Possibly Dacus passiflora in mango in baggage from the Fiji Islands. Olethreutes leucotreta in orange in stores from the Union of South Africa.

The pink bollworm (*Pectinophora gossypiella*) in cottonseed in baggage from Puerto Rico; in cotton boll in preflight inspection of baggage leaving Hawaii for the mainland;

and in seed cotton in baggage from Italy.

Rhagoletis cerasi in cherry in baggage from France, Germany, and Italy, in cherry in quarters from France; and in cherry in stores from the Azores, France, Israel, Italy, Portugal, and Switzerland.

The khapra beetle (Trogoderma granarium) in rice in cargo from India.

Interceptions of airborne plant pathogens of interest were:

Chrysomyxa ledi var. rhododendri on alpine azalea in baggage from Switzerland.

Daphne mosaic virus on foliage of daphne in mail from England.

Guignardia traversi on Stanhopea sp. in cargo from the Canal Zone.

Ophiodothella orchidearum on Epidendrum sp. in cargo from Cuba.

Phleospora pistaciae on pistache nut in baggage from Lebanon.

Phoma citricarpa on Citrus sp. in baggage from the Philippines; on lemon in stores from Portugal; and on Mandarin orange in baggage from Indo-China.

Phyllostictina pyriformis on an orchid leaf in cargo from Honduras.

Puccinia asparagi on asparagus in baggage from Greece. Puccinia buxi on a box leaf in baggage from Italy.

Puccinia scirpi on stems of Scirpus maritimus in baggage from Portugal.

Puccinia urbaniana on leaf of Stachytarpheta jamaicensis in baggage from Martinique.

Septoria unedonis on leaf of strawberry tree in baggage from Ireland. Uredo behnickiana on a leaf of Phajus sp. in cargo from Jamaica.

Uredo guacae on leaf of Epidendrum sp. in cargo from Jamaica; and on an orchid leaf in cargo from Honduras.

Uredo oncidii on leaf of Oncidium pulchellum in baggage from Jamaica.

Uromyces transversalis on a gladiolus leaf in cargo from the Union of South Africa. Citrus canker (Xanthomonas citri) on Mandarin orange in baggage from China; on Mandarin orange in baggage and stores from Japan and the Philippines; on an orange in baggage from China and Japan; and on an orange in stores from Japan.

The following nematodes were also found in airborne material:

The oat nematode (*Heterodera avenae*) in soil with dried seed beans in baggage from Brazil; in soil with fuchsia and oleander plants in baggage from Austria; in soil with strawberry plants in cargo from Germany; and in soil with tulip bulbs in baggage from Spain.

Heterodera fici in soil with carnation and fig plants in baggage from Italy; and in soil

with fig roots in mail from Italy.

Heterodera humuli in soil with hop cuttings in cargo from Switzerland.

Heterodera punctata in soil with narcissus bulbs and plants in baggage from Germany;

in soil with geranium plants and gladiolus corms in baggage from Ireland.

The golden nematode (*Heterodera rostochiensis*) in soil with pine seedlings in baggage from Germany; in soil with begonia, carnation, clover, and geranium plants in baggage from Germany; and in soil with potatoes in mail from England.

Pratylenchus penetrans with roots of clematis in cargo from the Netherlands.

NOTES ON INSECTS INTERCEPTED

FRUIT FLIES

The following fruit flies were intercepted:

Anastrepha distincta (?) in inga pod in air express from Guatemala.

Anastrepha fraterculus in grapefruit and orange in stores from Brazil and in sapodilla in air baggage from Venezuela. A. fraterculus (?) in grapefruit in stores from Brazil; and in orange in stores from Argentina and Brazil.

The Mexican fruit fly (Anastrepha ludens) in apple in baggage from Mexico; in grape-fruit in baggage from Mexico and in grapefruit in stores from Nicaragua; in Mandarin orange in baggage from Mexico; in mango in baggage, air baggage, and quarters from Mexico; in orange in baggage and air baggage from Guatemala; in orange in baggage, air baggage, quarters, stores and air stores from Mexico; and in pear, pomegranate, ponderosa lemon, quince, sapote, and sweet lime in baggage from Mexico.

The West Indian fruit fly (Anastrepha mombin praeoptans) in almonds in quarters from Trinidad; in grapefruit in stores from Barbados; in guava in baggage from Mexico and in air baggage from Nicaragua and Trinidad; in guava-berry in baggage and cargo from Tortola; in mango in air baggage from Costa Rica, Cuba, Guatemala. Haiti, Honduras, Jamaica, Mexico, Nicaragua, Panama, and Salvador; in mango in baggage from Mexico, Panama, and Puerto Rico; in mango in air cargo from Costa Rica, Guatemala, and Puerto Rico; in mango in cargo from Dominica; in mango in air mail from Puerto Rico and Salvador; in mango in air quarters from Guatemala; in mango in quarters from Cuba and Haiti; in mango in stores from Guatemala, Panama, and Puerto Rico; in pear in baggage from Mexico; in purple mombin in air baggage from Nicaragua; in Spondias sp. in air baggage from Nicaragua and Salvador; in Spondias sp. in baggage from Panama; in yellow mombin in air baggage from Guatemala, Nicaragua, and Salvador; in yellow mombin in air cargo from Guatemala; and in yellow mombin in cargo from Jost Van Dykes.

Anastrepha serpentina in Annona sp. in air baggage from Peru; in mamey sapote in baggage from Mexico; in sapodilla in air baggage from Guatemala, Nicaragua, and Salvador; and in star-apple in air cargo from Guatemala. One adult of A. serpentina in passenger's cabin of an airplane from Central America or South America.

Anastrepha striata in guava in air baggage from British Honduras, Costa Rica, Nicaragua, and Salvador; in guava in baggage from Mexico; in guava in air quarters

from Guatemala; and in mango in stores from Panama.

The Mediterranean fruit fly (Ceratitis capitata) in apple in air baggage and baggage from Italy; in apple in air quarters from Portugal; in apple in air stores from the Azores, Portugal, and Spain; in apple in stores from Spain; in apricot in air baggage from Italy; in apricot in cargo and stores from Spain; in apricot in air stores from Italy and an unknown origin; in carambola in baggage from Hawaii; in coffee berries in air baggage from Brazil; in coffee berries in baggage from Hawaii; in coffee berries in preflight inspection of baggage and cargo leaving Hawaii for the mainland; in coffee berries in mail leaving Hawaii for the mainland; in Crataegus sp. in baggage from Italy; in fig in air baggage from the Island of Rhodes and Italy; in grapefruit in quarters from Israel; in grapefruit in stores from Israel and Italy; in guava in air baggage from the Azores and Israel; in loquat in air baggage from the Azores; in Mandarin orange in air baggage from Cape Verde Islands and Israel; in Mandarin orange in baggage from Italy; in medlar in air baggage from Italy; in nectarine in air stores from France; in orange in air baggage from Israel, Italy, Lebanon, and Portugal; in orange in baggage from Algeria, Greece, and Italy; in orange in quarters from the Union of South Africa; in orange in air stores from the Azores, Israel, Portugal, and Spain; in orange in stores from Brazil, Canary Islands, Egypt, Israel, Italy, and Spain; in peach in air baggage from Italy, Lebanon, Portugal, and Spain; in peach in baggage from an unknown origin; in peach in air stores from Brazil, France, Italy, Portugal, Spain, and an unknown origin; in peach in stores from France; in pear in air baggage from France, Portugal and Spain; in pear in baggage from Spain; in pear in air quarters from Libya and unknown origin; in pear in quarters from Portugal; in pear in air stores from Portugal; in pear in stores from Spain; in pomegranate in baggage from Italy; in pricklypear in air baggage from Sicily; in pricklypear in baggage and stores from Italy; in quince in air baggage from Greece; and in sweet lime in air baggage from the Azores. C. capitata (?) in almond in air baggage from Greece; in apple in air quarters from the Azores (?); in apple in air stores from Portugal; in coffee berry in preflight inspection of baggage leaving Hawaii for the mainland; in grape in baggage from Italy; in grapefruit in stores from British East Africa; in guava in air baggage from the Azores and Portugal; in guava in air quarters from an unknown origin; in lemon in air stores from Spain; in mango and mountain apple in preflight inspection of baggage leaving Hawaii for the mainland; in nectarine in air stores from Brazil; in orange in air baggage from Israel and Italy; in orange in baggage from Italy and Palestine; in orange in air stores from the Azores, Portugal, and Spain; in orange in stores from Brazil; in peach in air baggage from Italy; in peach in air stores from Spain and an unknown origin; in pear in air quarters from Italy; in persimmon in air baggage from Italy; and in pricklypear in baggage from Italy.

The melon fly (Dacus cucurbitae) in cucumber and tomato in stores from Hawaii. One adult of the melon fly was found on an airplane during preflight inspection at Hickam Field, Hawaii and another adult was found at Hickam Field on the flight deck of an airplane originating in Midway.

The oriental fruit fly (Dacus dorsalis) in coffee berries, mango, papaya, and ti berries in preflight inspection of baggage leaving Hawaii for the mainland; and in Ficus sp., guava, and persimmon in mail leaving Hawaii for the mainland. One adult of D.

dorsalis was found on an airplane from the West Pacific (?) and another adult was found during preflight inspection of a plane leaving Hawaii for the mainland. D. dorsalis (?) in mango in baggage from Hawaii; in *Thevetia peruviana* in preflight inspection of baggage leaving Hawaii for the mainland; and in tropical almond in mail leaving Hawaii for the mainland.

The olive fruit fly (Dacus oleae) in olive in air baggage from Greece, Italy, Lebanon,

and Portugal; and in olive in baggage, air stores, and stores from Italy.

Dacus passiflorae (?) in mango in air baggage from the Fiji Islands.

Rhagoletis cerasi in cherry in air baggage from France, Germany, and Italy; in cherry in air quarters from France; and in cherry in air stores from the Azores, France, Israel, Italy, Portugal, Switzerland, and an unknown origin.

Rhagoletis completa in black walnut in baggage from Mexico.

The apple magget (Rhagoletis pomonella) in apple in air baggage and baggage from Mexico.

The papaya fruit fly (Toxotrypana curvicauda) in papaya in stores from Costa Rica.

INSECTS OTHER THAN FRUIT FLIES

The following miscellaneous insects of unusual interest were intercepted:

The citrus blackfly (Aleurocanthus woglumi) on an orange leaf and on a leaf of Citrus sp. in baggage from Mexico and on sour lime leaf in cargo from Mexico.

A tortricid, Austrotortrix postvittana in apple in cargo from New Zealand. Bruchophagus glycyrrhizae (Eurytomidae) on Glycyrrhiza sp. in mail from Iran.

Coptotermes niger, a very destructive termite, in wooden packing case in cargo from

A curculionid, Cylas formicarius ssp. in sweetpotato in air cargo from the Philippines and Thailand and in *Ipomoea* sp. in cargo from China.

Dyspessia ulula (Cossidae) in garlic in cargo from Italy.

A coccinellid, Epilachna paenulata, on banana in cargo from Ecuador.

A coccinellid, Epilachna philippinensis, on clothing of a crew member on an airplane from Guam.

Frankliniella schultzei (Thripidae) on carnation in air quarters from South America and on chinkerichee in air cargo, cargo, and mail from the Union of South Africa. A chrysomelid, *Lilioceris lilii* with lily bulbs in air baggage from Italy.

Olethreutes leucotreta (Olethreutidae) in grapefruit from the Union of South Africa; in orange in stores from Mozambique and the Union of South Africa; and in navel orange in air quarters from North Africa (?).

The durra stem borer (Sesamia cretica) in broomcorn in cargo from Italy.

Stephanoderes hampei (Scolytidae) in coffee berries in baggage and mail from Brazil;

and in coffee berries in mail from Ceylon.

Trogoderma granarium (Dermestidae) with used burlap bags in cargo from India; with grain bags containing wheat bran, corn meal, and crushed oats from Australia; in rice in stores from Formosa and India; in split peas in stores from India; and in peanut in stores from Formosa.

SNAILS

The giant African snail (Achatina fulica) was intercepted on cut flowers of torch

ginger during preflight inspection of baggage leaving Hawaii for the mainland.

Bradybaena similaris, an injurious snail not established in the United States, was intercepted 119 times with cut flowers and plant material in baggage, cargo, and mail leaving Hawaii for the mainland. It was also intercepted with pineapple in baggage from Brazil and cut flowers of Lilium sp. in baggage from Bermuda.

Lamellaxis gracilis, injurious in greenhouses and not established in the United States, was found on a philodendron plant during mail inspection of material leaving

Hawaii for the mainland.

Other snails of economic importance but of limited distribution in the United States worthy of mention are: Deroceras reticulatum, Limax flavus, L. marginatus, Milax gagates, Oxychilus allarius, Theba pisana, and Zonitoides orboreus.

NOTES ON DISEASES INTERCEPTED

The sweet orange scab was intercepted 74 times; 16 of these interceptions came from Argentina on lemon, Mandarin orange, and orange; 57 from Brazil on grapefruit, lemon, Mandarin orange, orange, and sour lime; and one from an unknown origin on orange. Citrus canker (Xanthomonas citri) was intercepted 137 times; 96 of these came from

Japan, 33 from China, 3 from Thailand, 2 from the Philippines, and one each from Ceylon, India, and the Straits Settlements. These interceptions were made from the following hosts: Citrus grandis, C. ichangensis var., C. x ichandarin, C. sinensis junos, grapefruit, lemon, Mandarin orange, sour lime, sour orange, and sweet orange.

Cancrosis B. (Xanthomonas sp.), another bacterial disease of citrus, producing symptoms similar to citrus canker, was intercepted twice on lemon from Brazil and once on

grapefruit from Brazil (?).

Other interceptions are:

Cercospora cypripedii on an orchid leaf in mail from Mexico; and on leaf of Stanhopea sp. in baggage from Mexico.

Daphne mosaic virus on daphne foliage in air mail from England.

Diaporthe citri on grapefruit in stores from Ecuador.

Eudarluca australis on chrysanthemum in air baggage from Japan.

Monilinia fructigena on plum in air baggage from France.

Phoma citricarpa on grapefruit in stores from British East Africa; on grapefruit in stores from Egypt; on grapefruit in baggage from Pakistan; on lemon in air stores from Portugal; and on Mandarin orange in air baggage from Indo-China.

Puccinia erythraeensis on leaves of Hyparrhenia lintonii in mail from Kenya.

Puccinia miscanthi on Miscanthus sp. in baggage from Japan. Puccinia phyllostachydis on bamboo leaf in express from Japan.

NEMATODES

The oat nematode (*Heterodera avenae*) was intercepted 32 times from the following countries: Austria, Brazil, Denmark, England, Germany, Greece, Israel, Italy, Spain, and Tunisia. These interceptions were taken in soil with dried seed beans, soil with bulbs, soil with plant material, soil with snails, soil with vegetables, soil with automobiles, and with soil scooped up by a jet plane which crashed in England.

The golden nematode (Heterodera rostochiensis) was intercepted 25 times from the following countries: Argentina, England, Germany, Ireland, Mexico, Peru, and Scotland. These interceptions were taken in soil with bulbs, with plant material, and

with vegetables.

Rotylenchus bradys, not known to be established in the United States, was intercepted

in yam in baggage from Trinidad.

Some other nematodes of possible concern were several species of the genus *Meloidogyne* intercepted from Brazil, Canada, Greece, Guatemala, Hawaii, Israel, Italy, Japan, Mexico, Netherlands, Syria, and Trinidad with various plant materials and with vegetables.

INCOMPLETELY DETERMINED PESTS

Frequently insects or pathogens affecting plant material are found in such stage or conditions that an accurate determination is impossible or impracticable. Some of these pests may be of economic importance.

INSECTS

Among the incompletely determined insects were the following fruit flies:

Anastrepha sp., possibly distincta, at New Orleans, La., in inga pod in air mail from Costa Rica and in inga pod in air express from Guatemala.

Anastrepha sp., probably fraterculus, at Baltimore, Md., in grapefruit in stores from Trinidad; at Charleston, S. C., in grapefruit in stores from Ecuador; at Eagle Pass, Tex., in mango in baggage from Mexico; at New York, N. Y., in Annona spp. in air stores from Colombia and in cherimoya in air baggage from Colombia; and at San Veidra Colif. in mango in baggage from Mexico. Ysidro, Calif., in mango in baggage from Mexico.

Anastrepha sp., possibly ludens, at Brownsville, Tex., in apple and pear in baggage from Mexico; at El Paso, Tex., in orange and pear in baggage from Mexico; at Laredo, Tex., in grapefruit in baggage from Mexico; at Miami, Fla., in soursop in air baggage from Nicaragua; and at San Antonio, Tex., in white sapote in air baggage from Mexico.

Anastrepha sp., possibly mombin praeoptans, at Laredo, Tex., and at San Ysidro, Calif., in mango in baggage from Mexico. Anastrepha sp., very much like mombin prae optans, at New York, N. Y., in Spondias sp. in baggage from Ecuador.

Anastrepha sp., possibly serpentina, at San Antonio, Tex., in quince in air baggage

from Mexico.

Anastrepha sp., possibly striata, at San Juan, P. R., in guava in air baggage from the Dominican Republic.

Anastrepha sp. at Baltimore, Md., in orange in stores from Peru; at Brownsville, Tex., in mango in air baggage from Nicaragua and in mango, orange, pear, pomegranate and sapote in baggage from Mexico; at Corpus Christi, Tex., in mango in stores from Ecuador; at Eagle Pass, Tex., and El Paso, Tex., in mango in baggage from Mexico; at Hidalas Text in angle and mange in baggage from Mexico; at Hidalas Text in angle and mange in baggage from Mexico; at Hidalgo, Tex., in apple, avocado, and mango in baggage from Mexico; at Houston, Tex., in mango in air baggage from Mexico and in orange in stores from Brazil; at Laredo, Tex., in mamey sapote in baggage from Mexico; at Miami, Fla., in mango in air baggage from Honduras, Nicaragua, and Panama; at Mobile, Ala., in grapefruit in stores from Argentina; in mango in air baggage from Panama; and in mango in quarters from Trinidad; at New York, N. Y., in Annona spp. in air baggage from Colombia and Venezuela; at Philadelphia, Pa., in orange in stores from Brazil; at Roma, Tex., in apple in baggage from Mexico; at San Antonio, Tex., in white sapote in air cargo from Mexico; and at San Juan, P. R., in sapodilla in air baggage from the Dominican Republic. Republic.

Dacus sp. at Honolulu, Hawaii in balsamapple in preflight inspection of baggage leaving Hawaii for the mainland; at Honolulu, Hawaii in Nephelium lappaceum in air

baggage from Thailand.

Rhagoletis sp. at Galveston, Tex., in crab apple in quarters from Mexico; and at

El Paso, Tex., in thornapple in baggage from Mexico.

Thirty-three interceptions, identified to family only, Tephritidae, were intercepted at the following ports: Baltimore, Md., in cucumber in stores from Liberia and in grapefruit in stores from Brazil; at Boston, Mass., in lemon in stores from Australia; in orange in stores from Argentina; a pupa with parsley in air stores from France (?); and in squash in stores from Indonesia; at Brownsville, Tex., in apple and Rosaceae fruit in baggage from Mexico; at Honolulu, Hawaii in apple in air stores from Australia and Japan; in cactus fruit in air baggage from Guam; in Durio zibethinus in air baggage from the Philippines (?); in mangosteen in air stores from Malaya; and in santol in air baggage from the Philippines; at Miami, Fla., in Pyrus sp. in air baggage from Panama; at New York, N. Y., in Cynara sp. (wild artichoke) in cargo from Italy; in globe artichoke in stores from Italy; in orange in air baggage from Turkey; in plum and radish in air baggage from France; at Nogales, Ariz., with cactus plants in cargo from Mexico; at Philadelphia, Pa., in flower head of bachelors-button in air quarters from an unknown origin; in grapefruit in stores from Australia; and in turnip in stores from French West Africa; pupae at San Antonio, Tex., with leaves of Chamaedorea oblongata and Chamaedorea sp. in air cargo from Mexico; and in orange in air stores from England; at San Diego, Calif., in tomato in stores from Hawaii; at Seattle, Wash., in mango in air baggage from the Philippines; and at Washington, D. C., in miyama cherry in mail from Japan and pupae with Rosa sp. in mail from Iran.

Other incompletely determined insects worthy of mention were:

A bruchid, Acanthoscelides sp., apparently new to the National Museum collection, at Washington, D. C., with Calopogonium mucunoides in mail from Costa Rica.

Aceria sp. (Eriophyidae), possibly a new species, at Washington, D. C., on Agropyron

sp. in mail from Iran.

Arphanus sp. (Lygaeidae), a new species, at Nogales, Ariz., on an orchid plant in

cargo from Mexico

A coccid, Aspidiotus sp., not recognized as a described form, at San Pedro, Calif., on an orchid leaf in air cargo from Ecuador.

Baris sp. (Curculionidae) at Houston, Tex., in turnip in stores from France.

Blastodacna sp. (Blastodacnidae) at New York, N. Y., in apple in air stores from England.

An undescribed bruchid, apparently representing a new genus and a new species, at

Washington, D. C., in seeds of *Prosopis* sp. in mail from Argentina.

Bruchidius sp., near cicatricosis (Fahr.) (Bruchidae) and new to the National Museum collection, at Washington, D. C., in crotalaria seed pod in mail from Rhodesia.

Bruchidius sp., near jocosus (Schonh.) (Bruchidae), new to the National Museum collection, at New York, N. Y., in white lupine seed in mail from Greece.

Bruchidius sp., near orchesioides (Heyd.) (Bruchidae), at Washington, D. C., in

Lotus sp. pod in mail from Rhodesia.

Bruchidius sp. (Bruchidae), new to the National Museum collection, at Washington, D. C., in seed of Alysicarpus rugosus in mail from Rhodesia and Tanganyika; in seed pod of Astragalus sp., and seed of sainfoin in mail from Iran; and with Tephrosia sp. seed pod in mail from Rhodesia.

A curculionid, Cleonus sp. at Philadelphia, Pa., in beet in stores from Egypt; and at

New York, N.Y., with horseradish in cargo from Germany.

A phycitid, Cryptoblabes sp., at Honolulu, Hawaii on Brazilian peppertree berries in mail leaving Hawaii for the mainland.

A curculionid, determined to family only, at New Orleans, La., in pigeonpea pod in air baggage from Panama.

Cyrtozemia sp., evidently dispar Pasc. (Curculionidae), at Washington, D. C., with

Solanum xanthocarpum in mail from India.

"Eulia" sp. (Tortricidae) at New York, N.Y., with grapes and peaches in cargo from

Gnorimoschema sp., near or equals atriplicella (F. R.) (Gelechiidae), at Boston, Mass., in tomato in stores from French West Africa.

A curculionid, Gonipterus sp., evidently scutellatus Gyll., at New York, N. Y.,

with grapes in cargo from the Union of South Africa.

Gymnandrosoma sp. (Olethreutidae) at Baltimore, Md., in an orange in quarters from Ecuador; at Galveston, Tex., in grapefruit in stores from Mexico; and at Houston, Tex., in an orange in stores from Mexico.

Hepialus sp. (Hepialidae) at Laredo, Tex., in a psuedobulb of Cattleya sp. in cargo from Mexico; and at Hoboken, N. J., in pseudobulb of *Dendrobium* sp., in mail from

India.

Heterarthrus sp. (Tenthredinidae) at Washington, D. C., in Rhododendron albrechtii leaf in mail from Japan.

Hoplothrips sp. (Phlaeothripidae), probably one of the old European species, at

Philadelphia, Pa., in celery in stores from Italy.

Hyperodes sp., probably hirtella (Dtz.) (Curculionidae), at Miami, Fla., with an

orchid plant in air mail from the Canal Zone.

Hyperodes sp., at Charleston, S. C., in carrot in stores from Argentina; at Honolulu, Hawaii with orchid plants in mail from the Canal Zone; at Miami, Fla., with a leaf of Trichopilia suavis in air mail from the Canal Zone; at Philadelphia, Pa., in carrot in stores from Argentina; at San Pedro, Calif., with orchid plants in cargo and mail from the Canal Zone; and at Seattle, Wash., with orchid plants in mail from the Canal Zone.

A scolytid, Ips sp., at Mobile, Ala., in pine bark crating in air cargo from North

Africa.

An ant, Iridomyrmex sp., probably a new species for the National Museum collection, at Nogales, Ariz., on an orchid plant in cargo from Mexico.

Lepidosaphes sp., very close to noxia McKenzie (Coccidae), but probably distinct,

at Hoboken, N. J., on a leaf of *Vanilla* sp., in air cargo from British East Africa. *Leucaspis* sp. (Coccidae) at Chicago, Ill., with arborvitae plants in mail from New Zealand.

A pyraustid, Leucinodes sp., not represented in the National Museum collection, at Washington, D. C., with Solanum sp., in mail from the Union of South Africa.

Lixus sp. (Curculionidae) at Baltimore, Md., in beet in stores from Italy; and at

Philadelphia, Pa., in beet in stores from Egypt.

Longitarsus sp., probably ochroleucus Mshl. (Chrysomelidae) at Boston, Mass., with

chrysanthemum in air baggage from England.

A lygaeid, new genus and new species, at New York, N. Y., with forest litter, containing mostly sphagnum moss, in air stores from Colombia.

Margarodini (Coccidae), genus uncertain, but a very interesting collection, at Washington, D. C., on an undetermined grass in mail from Iran.

A curculionid, *Mecinus* sp., at Hoboken, N. J., on an aleppo pine cone in air mail from Greece. Oxythrips sp. (Thripidae) at New York, N. Y., on a pine tree in air baggage from

Sweden. Pectinophora sp., platyedra complex, (Gelechiidae), at Chicago, Ill., with Plagianthus

betulinus seeds in mail from New Zealand. A scolytid, Pelicerus sp., at Washington, D. C., with Garcinia spicata seeds in

mail from Okinawa. Phenacoccus sp. (Coccidae), an undescribed species, at New York, N. Y., on galanthus bulbs and twinleaf squill bulbs in cargo from Turkey.

Phloeosinus sp. (Scolytidae) at Portland, Oreg., in Cryptomeria sp. bark in air cargo from Japan.

Phyllotreta sp., probably flexuosa (Ill.) (Chrysomelidae), at Philadelphia, Pa., on

cabbage in stores from England. Pieris sp. (Pieridae) at Charleston, S. C., on cabbage in stores from Belgium and

New Zealand; at Philadelphia, Pa., on Chinese cabbage in stores from Japan; and at Port Arthur, Tex., on cauliflower in stores from England.

A chrysomelid, *Plagiodera* sp., probably *jucunda* (Klug), at Miami, Fla., on a brome-

liad leaf in air baggage and air cargo from Paraguay.

An ant, *Plagiolepis* sp., very probably *alluaudi* Emery, at Charlotte Amalie, St. Thomas on gladiolus in baggage from St. Kitts.

Podothrips sp., near longiceps J.-G. (Phlaeothripidae), at Boston, Mass., on semidry grass in baggage from the Union of South Africa.

Prays sp. (Hyponomeutidae) at Boston, Mass., in pomelo in stores from Indonesia. A curculionid, Premnotrypes sp., at Philadelphia, Pa., on Solanum tuberosum var. in stores from Ecuador.

Psammodius sp. (Scarabaeidae) at Honolulu, Hawaii with grapes in air stores from Eniwetok; and at New York, N. Y., with soil in mail from Israel.

Rhynchites sp. (Curculionidae) at Boston, Mass., in cherry in air stores from France.

Tingis sp. (Tingidae) at Washington, D. C. with fescue in mail from Iran.

A tortricid not represented in the National Museum collection at Honolulu.

A tortricid, not represented in the National Museum collection, at Honolulu, Hawaii in air baggage from Japan; and a tortricid at Laredo, Tex., on an orchid plant in cargo from Mexico.

A curculionid, Zeugorygma sp., probably orangiae Mshl. or a new species, at Washington, D. C., with Setaria perennis seed head in mail from the Union of South Africa.

DISEASES

Incompletely determined pathogens worthy of mention were:

Ascochyta sp. at Laredo, Tex., on Yucca elephantipes in cargo from Mexico.

Cercospora sp. at Brownsville, Tex., on Chamaedorea sp. leaf in baggage from Mexico;
at Houston, Tex., on palm fronds in air cargo from Mexico; at San Juan, P. R., on Clerodendron thomsonae leaf for export to the mainland.

Corynespora sp., probably cassiicola (Berk. & Curt.) Wei, on Chamaedorea sp. in air cargo from Mexico.

Cytospora sp. at Nogales Ariz., on orchid stem in cargo from Mexico; and at San Francisco, Calif., on tree peony in cargo and mail from Japan.

Cytosporina sp. at Nogales, Ariz., on orchid in cargo from Mexico.

Didymosphaeria sp. at Laredo, Tex., on an orchid plant in cargo from Mexico.

Pestalotia sp. at Miami, Fla., on Pinanga kuhli seed in air mail from Ceylon; at San Juan, P. R., on a kalanchoe leaf in cargo for export to the mainland; and at Washington D. C. and a calculate in mail from Larent D. C. and a calculate in mail from Larent D. C. and a calculate in mail from Larent D. C. and a calculate in mail from Larent D. C. and a calculate in mail from Larent D. C. and a calculate in mail from Larent D. C. and a calculate in mail from Larent D. C. and a calculate in mail from Larent D. C. and a calculate in mail from Larent D. C. and a calculate in mail from Larent D. C. and a calculate in mail from Larent D. C. and a calculate in mail from Larent D. C. and a calculate in mail from Larent D. C. and a calculate in mail from Larent D. C. and a calculate in mail from Ceylon; at Larent D. C. and a calculate in m

ington, D. C., on an oak leaf in mail from Japan.

Phomopsis sp. at El Paso, Tex., on seeds of sandboxtree in baggage from Mexico.

Septoria sp. at Hoboken, N. J., on an aster leaf in cargo from England; at Laredo, Tex., on philodendron leaf in baggage from Mexico; and at Washington, D. C., on leaf of Boissiera bromoides in mail from Iran.

Probably Sphenospora sp. at Miami, Fla. on a leaf of Catasetum sp. in air cargo from the Canal Zone; and at San Pedro, Calif., on Oncidium macranthum and Oncidium sp. plants in air cargo from Ecuador.

Uredo sp. at Miami, Fla., on leaves of Ornithocephalus sp. and Schomburgkia sp. in

air cargo from Ecuador.

NEMATODES

Incompletely determined nematodes worthy of mention were:

Aphelenchoides sp. at Boston, Mass., in soil with burdock, carrots, and potatoes in stores from Japan; in soil with carrots in stores from Norway; in soil with lettuce in stores from Egypt; in soil with roots of Liliaceae in air baggage from Greece; with parsnips in stores from Denmark; and with rutabagas in stores from the Netherlands; at Hoboken, N. J., in roots of *Helleborus niger* hybrid in air mail from England; at Newl York, N. Y., in narcissus bulbs in cargo from France and Italy; at Philadelphia, Pa., in lily bulb in cargo from Japan; at Port Everglades, Fla., in potatoes in stores from Belgium; at San Francisco, Calif., in lily bulb in mail from New Zealand and in magnolia plant in mail from Japan; at San Juan, P. R., in tobacco stump in air baggage from the Dominican Republic; and at Washington, D. C., in Boehmeria sp., in mail from Martinique.

Aphelenchus sp. at Boston, Mass., in soil with potatoes in stores from New Zealand; at Hoboken, N. J., in Oreocereus trollii in mail from Canada; at San Francisco, Calif., in peony in baggage from Japan; at San Juan, P. R., in tobacco stump in air baggage from the Dominican Republic; and at Tampa, Fla., in soil with samples of ore in

cargo from Belgium.

Ditylenchus sp., closely related to dipsaci (Kuhn) Filip. at Hoboken, N. J., in Polianthes

sp. tuber in cargo from Italy.

Ditylenchus sp. at Boston, Mass., in iris in cargo from the Netherlands; at El Paso,
Tex., in garlic in cargo from Mexico; and at Philadelphia, Pa., in garlic in cargo from Mexico.

Heterodera sp., possibly avenae, at New York, N. Y., in soil with potatoes in stores from Iceland; at St. Thomas and St. John in soil with beets in stores from England.

Heterodera sp., possibly fici at New York, N. Y., in soil with roots of Ficus sp. in

baggage from Italy.

Other members of the genus *Heterodera* were intercepted 351 times at 18 ports from the following countries: Argentina, Australia, Austria, Azores, Belgium, Canada, Chile, Denmark, Egypt, England, Finland, France, Germany, Greece, Ireland, Italy, Japan, Korea, Liberia, Luxembourg, Mexico, Morocco, Netherlands, New Zealand, Poland, Portugal, Scotland, Spain, Sweden, Switzerland, Tasmania, Tunisia, Venezuela, and Yugoslavia. These interceptions were made from soil ballast, soil samples, soil on private automobiles, soil on army automobiles, soil with sweepings from railway car, and soil with potatoes in railway car; soil with bulbs and tubers in baggage, cargo, and mail; soil with plant material in baggage, cargo, mail, and quarters; soil with vegetables in cargo and stores; and in soil with snails in cargo.

Meloidogyne sp., probably arenaria (Neal) Chitwood var. thamesi Chitwood, at

New York, N. Y., in gladiolus bulb in cargo from Japan.

Meloidogyne sp., possibly hapla Chitwood, at Hoboken, N. J., in Achimenes sp. tuber in air mail from India.

Meloidogyne sp., possibly a new species, at Brownsville, Tex., in begonia root in

baggage from Mexico.

Meloidogyne sp. at Brownsville, Tex., in begonia root in cargo from Mexico; at El Paso, Tex., in turnip in baggage from Mexico; at Hoboken, N. J., in tubers of Achimenes spp. in air cargo from India and in cargo and mail from the Netherlands; in anemone roots in air mail from Japan and in mail from Germany; in caladium tubers in air cargo from Belgium; in calla lily rhizomes in cargo from France and Italy; in roots of Callopsis sp. in air mail from England; in roots of Cimicifuga foetida simplex in cargo from the Netherlands; in roots of Cissus amazonica in air cargo from Germany; in clematis roots in air cargo and cargo from the Netherlands; in roots of Corytholoma bulbosum in air cargo from Brazil and in roots of C. cardinális in air mail from the Netherlands; in roots of Curcuma petiolata and C. roscoeana in cargo from the Netherlands; in roots of Epimedium sp. in air mail from Japan; in tubers of Gesneria umbellata in mail from the Netherlands; in iris roots in cargo and mail from Japan; in roots of Isoloma pictum in air mail and Isoloma sp. in mail from the Netherlands; in roots of Kaempferia galanga in cargo and air mail from India and in Kaempferia spp. in cargo from the Netherlands; in tubers of Naegelia hybrids in cargo, air mail, and mail from the Netherlands; in roots of tuberoses in air mail from Israel and in mail from Italy; in roots of Primula sieboldi var. in mail from the Netherlands; in roots of Rechsteineria macropoda in air mail and mail from the Netherlands; and in tuber of Thomsonia nepalensis in mail from India; at Laredo, Tex., in Mammillaria sp. roots in mail from Mexico; at New York, N. Y., in hyacinth bulb in cargo from Bermuda; and in tuberose roots in cargo from Italy.

Paraphelenchus sp. at San Francisco, Calif., in roots of Magnolia conspicua and

Magnolia sp. in mail from Japan.

Pratylenchus sp., near vulnus Allen & Jensen, at Tampa, Fla., in soil with a potted

plant in air baggage from Cuba.

Pratylenchus sp. at Hoboken, N. J., in astilbe roots in cargo from the Netherlands; in Clematis spp. roots in mail from England and in cargo from the Netherlands; in roots of Helleborus niger and H. viridis in air mail from England and in H. niger and Helleborus sp. in air cargo from the Netherlands; in roots of Pulmonaria saccharta in cargo from the Netherlands; at New York, N. Y., in lily-of-the-valley pips in baggage from France; and at Washington, D. C., in roots of Boehmeria sp. in mail from Martinique.

Rotylenchus sp. at Brownsville, Texas, in soil with begonia and mint plants in baggage from Mexico; and at San Francisco, Calif., in peony roots in baggage from

apan.

Tylencholaimus sp. at Honolulu, Hawaii in soil samples in air baggage from Japan. Tylenchus sp. at Boston, Mass., in soil with artemesia plant in baggage from Italy; at Honolulu, Hawaii in soil in quarters from Okinawa; and at Miami, Fla., in soil with coffee plants in air baggage from Salvador.

Xiphinema sp. at San Francisco, Calif., in peony roots in baggage from Japan.

Summary of Numbers of Interceptions Listed in Main Table

Countries of Origin and Diseases — Continued

PORTUGAL: ‡Heterodera fici †Phoma citricarpa Phyllachora graminis Puccinia scirpi PUERTO RICO:

Cercospora musae Phomopsis capsici †Puccinia heliconiae RHODESIA:

Cerebella andropogonis ST. KITTS:

†Cercospora canescens
ST. LUCIA:
†Phytophthora palmivora
SALVADOR:

Mycosphaerella cattleyae SCOTLAND: Heterodera rostochiensis Lophodermium pinastri SPAIN:

Alternaria dianthi Heterodera avenae †Macrophoma araucariae Septoria citri

Uromyces betae STRAITS SETTLEMENTS: †Phyllostictina pyriformis
Xanthomonas citri
SWEDEN:

Gymnosporangium juniperi (?) Heterodera punctata SWITZERLAND:

Chrysomyxa ledi var. rhododendri

Heterodera humuli Heterodera punctata

Heterodera punciaia
SYRIA:

†Meloidogyne incognita acrita
THAILAND:
Xanthomonas citri
TRINIDAD;

†Colletotrichum dracaenae
†Meloidogyne incognita
†Phomopsis orchidophila
†Rotylenchus bradys
TUNISIA:
Heterodera avenae

Heterodera avenae TURKEY:

Tilletia caries
UNION OF SOUTH AFRICA:
Meloidogyne incognita acrita

Meloidogyne incognita acrita
†Meloidogyne javanica
Phoma citricarpa
Puccinia ornithogali-thyrsoides
‡Sphaerella ceres
‡Uromyces transversalis
UNKNOWN:
Elsinoe australis
Heterodera rostochiensis
Phoma citricarpa
Septoria citri
VENEZUELA:
‡Cercospora citrullina

†Cercospora citrullina †Septoria apii YUGOSLAVIA:

‡Phoma acicola
